Portfolio: shafaisalgfg.github.io/shafaisal

SUMMARY

Associate Software Engineer with hands-on experience in web development, database systems, and scalable application design. Skilled in OOP principles, DSA, JavaScript, Angular, ASP.NET Core, and SQL. Built and deployed full-stack applications with authentication, routing, and real-world data integration. Quick learner with strong problem-solving and collaboration skills, eager to contribute to world-class web products.

EDUCATION

University of Management & Technology

[Sep 2024]

Bachelor of Science in Software Engineering – **CGPA 3.34/4.00**

WORK EXPERIENCE

Techlogix

Application Support Engineer (Job)

[Apr 10, 2025 – Sep 20, 2025]

- Supported Oracle FLEXCUBE modules (CASA, CIF, TD, User Management).
- Debugged PL/SQL procedures and ensured data replication across schemas.
- Performed testing, EOD operations, and upgrade validations in banking systems.

Software Engineer Trainee (Internship)

[Dec 09, 2024 – Apr 04, 2025]

- Gained exposure to enterprise-grade software development and debugging environments.
- Worked with databases, APIs, and backend systems in real-world scenarios.

PROJECTS (Relevant)

Expenses App (Angular + ASP.NET Core)

- Built a budgeting app with authentication and REST APIs. Deployed to Azure with GitHub Actions.

Contacts Manager (Windows Forms App, ASP.NET, C#)

- Windows utility for importing, cleaning and exporting phone contacts from text, CSV or Excel files.
- Designed for quick offline processing — detect and group numbers by country code, apply length-based filters, then export or copy lists in several formats.

GFG Font Changer (Browser Extension, JavaScript)

- Custom browser font changer for accessibility. It allows users to change fonts & font-sizes on each website individually.

CC Gen Ultimate (Flutter Windows App)

- Cross-platform app generating & translating subtitles using Faster-Whisper and LibreTranslate.

Smart Car Parking System (IoT + Web Final Year Project)

- Designed an IoT-enabled parking system with ESP32, RFID, MySQL, PHP, and JavaScript.

CORE SKILLS

Frontend: Angular, TypeScript, HTML, CSS, Bootstrap, JavaScript

Backend: ASP.NET Core, C#, Entity Framework, REST APIs, Swagger, Postman

Databases: MS SQL Server, Oracle SQL, MySQL

Tools & Cloud: GitHub, GitHub Actions, Git, SVN, Debugging, Node.js

Other: RxJS, Authentication (JWT/Microsoft Identity), Routing, Forms (Template-driven & Reactive)

CERTIFICATION & ACHIEVEMENTS

- [SQL \(Advanced\) \[Hacker Rank\]](#)
- [ASP.NET Core: Build RESTful APIs \[Udemy\]](#)
- [Angular – The Complete Guide \(2025 Edition\) \[Udemy\]](#)
